Settings

The screenshot shows the 'Calendar Notes' application window. The interface is divided into several sections:

- Calendar:** A calendar for August 2023. The 6th is highlighted.
- Navigation:** Buttons for 'TASKS', 'DOCS', and 'SEARCH'. Below 'SEARCH' is a text input 'test' and a 'GO' button.
- Notes List:** A list of notes including 'Work -> Reset Runtimes Script', 'How To/GitHub git -> GitHub ...', 'JS Programming -> Promises', 'Crazy Ideas -> Solar', 'Work -> Automation Lab Net...', 'Research -> DDE', 'SQL Tips/SQLITE -> SQLite ...', 'How To -> Owncloud 20.04 S...', and 'Work -> Future Planned Work'.
- Settings Panel:** A panel on the right with sections: 'DATABASE -' (SQL Lite (Local DB) selected, with a text input 'calendarnotes.db' and a button), 'THEMES -' (Default selected), 'EDITOR -' (Spell Checking unchecked), and 'EXPERIMENTAL -' (Documents checked). At the bottom of the panel is an 'APPLY/CLOSE' button.
- Footer:** Buttons for 'SAVE', 'EDIT', 'MARKDOWN', 'SIDE-BY-SIDE', and 'REVERT'.

Two blue callout boxes with arrows point to specific elements:

- The first box points to the 'calendarnotes.db' text input and is labeled with the variables: `settingsText` and `settingsBack`.
- The second box points to the 'APPLY/CLOSE' button and is labeled with the variables: `buttonsText`, `buttonsBack`, `buttonsBorder`, `buttonsHoverText`, and `buttonsHoverBack`.
